ABOUT

Experienced frontend/UI developer with 5 years of hands-on experience building interfaces across various sectors such as travel, finance, and EDI. Eager to tackle new challenges, I thrive in collaborative settings and enjoy working closely with designers to create interfaces that mirror design concepts.

Currently, I am focused on expanding my frontend development skills. However, I am seeking a role where I can utilize my UI development expertise to the fullest.

WORK EXPERIENCE

User Interface Developer

KORUS Consulting CIS, esphere.ru   Nov 2021 — Nov 2023

The market leader in Russia for EDI solutions across the B2B, B2C, and B2G sectors

- Developed the UI of an electronic document management system (B2B & B2C) from inception to MVP
- Developed a new version of the UI for users' personal accounts, enhancing its usability and visual appeal
- Contributed to an internal project aimed at advancing UI development practices within the team
- Created UI components for interfaces primarily using React, TypeScript, and SCSS, refactored and optimized existing UI components
- Conducted code reviews for other UI developers
- Collaborated closely with cross-functional teams to develop and execute projects on time
- Participated in internal user interface (UI) meetings, presenting two papers on the HTML content model and stacking context

User Interface Developer

WebMoney, webmoney.ru   Mar 2019 — Oct 2021

Online payment platform with 31 million users

- Supported and refactored multiple legacy projects to enhance UI functionality and optimize user experience
- Developed the UI for a new project focused on purchasing train and aviation tickets
- Developed landing pages for various projects
- Developed UI for regular newsletters
- Implemented accessibility principles throughout the UI development process

Website Content Manager / User Interface Developer

Anex Tour, anextour.com   Feb 2018 — Feb 2019

The leading tour operator, which has been operating for 25 years, works in 47 countries

- Manged content publication requests
- Build and refined publications using a custom CMS
- Conducted proofreading and editing of texts to maintain quality and accuracy
- Collaborated closely with designers
- Developed landing pages for special projects
